IS YOUR FLEET COMPLIANT WITH BVLOS?

AlarisPro has been committed to supporting BVLOS requirements since 2016 and is uniquely positioned to support operators by maintaining compliance with BVLOS waivers. Here are just a few of the FAA requirements we can help you check off your list:

- ⊘ Ensure the remote PIC (manipulators of the control) and VO(s) are informed of the terms and provisions of the Waiver, strictly observe the terms and provisions, and have access to all essential documents
- ⊘ Maintain a current list of pilots by name and remote pilot certificate number used in operations
- ⊘ Maintain a current list of sUAS by registration number(s) used in operations
- ⊘ Ensure all operations and maintenance of each sUAS and its components comply with all manufacturer instructions, recommendations and limitations:
  - Scheduled overhaul, repair, inspection, modification, replacement and system software upgrades necessary for flight
  - Complete maintenance logs to include description of work performed, date, name and signature
- ⊘ Securely record flight logs for each functional test flight for any sUAS that has undergone maintenance
  - Logs include date, registration number, name, duration, and result of the test flight

With an established track record in aviation, safety, and technology, AlarisPro has helped several customers obtain waivers and comply with their BVLOS waivers!
